Colour printouts are more eye-catching, because colour expresses individuality and draws your attention to the key details. Our P-C3563i MFP, P-C3567i MFP, P-C4063i MFP and P-C4067i MFP A4 colour multifunctional systems help you to make your business documents stand out thanks to a high print resolution of max. 1,200 x 1,200 dpi and numerous digital image processing functions. At the same time, the systems comply with the latest security standards, ensuring your data is treated confidentially at all times.

What you can expect:

HIGH-SPEED PRINTING: With print speeds of 35 or 40 A4 pages/minute and scanning speeds of up to 120 image pages/minute, the systems place practically no limits on your productivity. They feature a dual scanner that enables you to scan double-sided master documents in a single pass, saving you time while protecting the original. And with the HyPAS™ app for the innovative MultiCrop document scanning function, you can even digitally crop, straighten and save several small-format originals as individual files in just one step.

VERSATILE AND COMPACT: The new generation of colour MFPs has been updated to be more compact and to support additional formats. Even thick paper, with weights of up to 220 g/m², or small-format documents such as prescriptions can be printed with ease. The MFPs feature a maximum paper capacity of 2,000 sheets, meaning you don't have to spend your time adding paper.

GUARANTEED SECURITY: From practical, contactless authentication via card reader* and chip card* or transponder* to the easy activation of the integrated Data Security Kit used to overwrite hard-drive data, you can always rely on these multifunctional systems. Features such as the Secure Boot process and the Run-Time Integrity Check, in combination with the Trusted Platform Module (TPM)*, also ensure that only authorised firmware can be used, providing longer-lasting protection for your data.

SIMPLY GOOD: With a touch screen that can be tilted by up to 90 degrees, the colour MFPs are intuitive easy to use, making light work of your document processes. You can also print or scan with the systems from your tablet or smartphone via the free Mobile Print App over Wi-Fi*.
